

NEW

Introducing Hill's™ Prescription Diet™ y/d™ Feline

-  Restricted iodine levels
 -  Helps support thyroid health
-  As easy as feeding
-  Complete daily nutrition with a taste cats love
 -  Available in dry and wet for easy compliance
-  Clinically proven

Additional benefits to your client	Feature
Helps support kidney health	Controlled phosphorus and low sodium
Supports urinary tract health	Controlled magnesium and urine pH (6.4-6.6)
Promotes healthy skin and a luxurious hair coat	High levels of Omega-3 and -6 fatty acids

Formula	Size	SKU
y/d™ Feline dry	1.5kg bag	1680
	5kg bag	1681
y/d™ Feline wet	24 x 156g can	1496

Compliance is important

Iodine from other food sources – treats, another pet's food, table scraps etc. – can compromise the effectiveness of restricted iodine nutrition. It is critical that your clients feed y/d™ as the sole source of nutrition.
